

INTERIOR

Dynamic Light Box

Interior Architectural Warranty

OVERVIEW

The dynamic light box takes a standard canvas light box and gives it life to capture the attention of potential customers. Instead of a static light source, the sign is filled with an array of individually-addressable LEDs. The light patterns can be customized based on the image on the front. Product dimensions are 100% customizable.

UPDATING

When ready to update the sign, only the canvas cover needs to be replaced. The lights inside remain and are simply reprogrammed.
